Applicant SIEMENS AKTIENGESE	LLSCHAFT						
1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.							
2. This REPORT consists of a total	of 5	heets, including this cover sheet.					
3. This report is also accompanied	by ANNEXES, comprising:						
a. (sent to the applicant	t and to the International Bureau) a tot	al of 2 sheets, as follows:					
sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).							
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental							
Box.							
b (sent to the Internation	onal Bureau only) a total of (indicate t	ype and number of electronic carrier(s))					
	, containing a sequence listing and/or tables						
	puter readable form only, as indicated ninistrative Instructions).	I in the Supplemental Box Relating to Sequence Listing (see					
4. This report contains indications	relating to the following items:						
Box No. I Basis o	of the report						
Box No. II Priorit	у						
Box No. III Non-e	stablishment of opinion with regard to	novelty, inventive step and industrial applicability					
Box No. IV Lack o	of unity of invention						
D G D O A 110. 1	Page 1 - 1 2 2 with regard to receive the series are a industrial applicability.						
Box No. VI Certain							
Box No. VII Certain	n defects in the international application	n					
Box No. VIII Certain	Box No. VIII Certain observations on the international application						
Date of submission of the demand	Date of c	ompletion of this report					
Name and mailing address of the IPEA/El	Authorize	ed officer					
Facsimile No.	Telephon	e No.

	Novelty (N)		Claims	1-19	YES
			Claims		NO
	Inventive ste	ep (IS)	Claims		YES
			Claims	1-19	NO
	Industrial ap	plicability (IA)	Claims	1-19	YES
			Claims		NO

- 2. Citations and explanations (Rule 70.7)
 - 1. Reference is made to the following documents:
 - D1: WO 02/085050 A1 (NOKIA CORPORATION; BONTEMPI, RICHARD; LOEPPOENEN, JUSSI; RAJAHALME, JA)

 24 October 2002 (2002-10-24)
 - 2. The present application does not meet the requirements of PCT Article 33(1) because the subject matter of claims 1-19 does not involve an inventive step (PCT Article 33(3)).
 - 2.1 Document D1 is considered the prior art closest to the subject matter of claim 1 and discloses (the references between parentheses refer to that document):

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

method for establishing a link between a mobile user initiating establishment of the link and other mobile users within a group of mobile users via at least one mobile telephone network ("PDP activation procedure", "one or more PDP contexts are created"; see page 5, line 1 - page 6, line 11; page 2, line 20 - page 3, line 2; page 16, lines 26-28 and fig. 1), wherein, upon establishment of the link, user data to be transmitted between the mobile user initiating establishment of the link and other users within the group is transmitted, in addition to signalling data, via a first channel ("Leader RTP packet", "VoIP packets", see page 11, lines 19-29; page 2, line 20 - page 3, line 2 and fig. 3).

The subject matter of claim 1 thus differs from that known from document D1 in that a **second** channel is also established for the link, the user data being transmitted via the second channel.

The present invention can therefore be considered to address the problem of increasing the transmission quality of the user data.

The solution proposed in claim 1 of the present application cannot be considered inventive for the following reasons:

The feature whereby a mobile station in a GPRS mobile telephone network activates a second

International application No. PCT/EP2004/051517

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

channel in which the user data is transmitted with a quality of service matching the quality requirements is a common measure; see, for example, document D2 ("Secondary PDP context", "Different QoS profile"; see page 125, lines 8-28). A person skilled in the art would regard the inclusion of this feature in the method described in D1 for establishing a link in a mobile telephone network as an obvious approach within the scope of normal technical practice.

The subject matter of independent claim 1 thus fails to involve an inventive step.

- 2.2 The same reasoning applies to the corresponding independent claims, claims 16 and 17.
- 2.3 Dependent claims 2-15, 18 and 19 do not contain any features which, in combination with the features of any claim to which they refer, meet the PCT requirements for inventive step; see the passages of text in documents D1 and D2 that are cited in the search report.
